

Our purpose is to create a safer and less uncertain world

Beamex is a trusted partner for calibration excellence, providing accurate measurements, reliable data, and traceability for a safer and less uncertain world. Beamex helps improve efficiency, ensure compliance, and increase safety with its comprehensive ecosystem of calibration solutions – from field calibration to workshop calibration, calibration management, and services.

Who we are

- 9 countries
- 250+ employees
- 80+ distributors

Everything we do, from buying food to driving a car or taking medicine, is dependent on precision measurements. Accurate measurements ensure that we get the right amount of food, fuel, and energy and that our medication is safe. They ensure our society functions well at all levels.

Calibration is key to ensuring that measurements are accurate and reliable, helping to improve efficiency, compliance, and safety while minimizing emissions, waste, and risks. Beamex precision calibration technology makes the world a safer and more sustainable place, with trustworthy measurements that are transparent and available for all.

Our offices

Our customers

- 12,000+ customers
- 140 countries

Beamex has more than 250 employees in 9 countries around the globe. In addition to our HQ and manufacturing facility in Finland we have subsidiaries in the USA, United Kingdom, Germany, France, and Canada. We also have sales offices in China, India, and the UAE.

Today more than 12,000 companies in 140 countries are using Beamex technology to calibrate their process instruments and manage their calibrations. Our largest global software customer uses Beamex calibration management software at 175 different sites in 24 countries.

What our customers say

“

Paperless calibration management forms a key part of engineering operations at our manufacturing sites, allowing paperless scheduling and recording of instrument calibration data to ensure we operate in a compliant manner. Beamex CMX calibration software ensures we comply with all relevant GxP regulations and removes the risk of manual error.”

GlaxoSmithKline Ltd, Ireland

“

Information is available at your fingertips in order to make quick decisions about the overall calibration status of the instrumentation. The mobile electronic component of Beamex allows technicians to focus on their work without the hassle of paper and other distractions. The CMX product has proved to be both robust and reliable without much required maintenance at our facility for more than three years.”

Boehringer Ingelheim, USA

“

We perform about 22,000 calibrations annually, which previously engaged 50 employees. Today, the same work can be accomplished with only 15 people.”

AstraZeneca, Sweden

What we offer our customers and partners

A BETTER WAY TO CALIBRATE

Intuitive user experiences and world-class customer care to make calibration easy for everyone.

A continuously developing ecosystem of state-of-the-art technology and services to cover all calibration needs.

Expert support from a dedicated, highly knowledgeable team means a great experience every time.

A BETTER WAY TO RUN A BUSINESS

Make smarter decisions and do smarter business with a lifecycle partner that helps optimize processes and operations and mitigate risks.

Get more from calibration data by connecting it to other business processes, helping to improve plant availability and capacity, for example.

Reduce error, improve efficiency, and ensure compliance with consistently accurate automated calibration processes.

A BETTER WAY TO A SUSTAINABLE FUTURE

Improve quality and compliance with trustable and traceable measurement data and our deep knowledge and expertise.

Future-proof operations with high-quality, reliable, and accurate calibration solutions.

Optimize processes to reduce production losses, improve efficiency, and reduce waste and emissions.
